

# Trusted Today Designed for Tomorrow

## Total Stations

For more than a decade, Trimble Robotic Total Stations have delivered superior performance. Today, we offer three total stations, each packed with innovative features that make surveying more efficient, no matter the project. Choose between an all-in-one station for maximum flexibility, an everyday workhorse for basic surveying, and an extremely precise model for specialized needs, all backed by Trimble's legendary training, service and support.

### Trimble S5 Power.

Count on the Trimble S5 total station to make your job easier, day after day, project after project. Built on proven Trimble technologies—including Trimble SurePoint™ and MagDrive™ technology, and our DR Plus EDM—this is the no nonsense workhorse that works efficiently and dependably while maintaining the highest possible accuracy.

- ▶ DR Plus EDM
- ▶ 1", 2", 3", 5"
- ▶ Robotic or Autolock®

### Trimble S7 Performance.

From SureScan to our improved VISION™, DR Plus and other exclusive Trimble technologies, this is the fully loaded total station that adapts to a range of situations and projects. The S7 is the ultimate high performer that enables you to stay productive and efficient, collecting data quickly and accurately, on a variety of jobs.

- ▶ DR Plus EDM
- ▶ 1", 2", 3", 5"
- ▶ Robotic or Autolock
- ▶ Trimble VISION
- ▶ SureScan
- ▶ FineLock™

### Trimble S9 Precision.

Whether your project involves monitoring, tunneling, or another highly specialized application, the Trimble S9 total station is the solution. It combines all of our top field technologies with our highest level of accuracy and our most advanced engineering features. The result is a high performance system built for the most demanding jobs.

- ▶ DR Plus or DR Plus HP EDM
- ▶ 0.5", 1"
- ▶ Robotic or Autolock
- ▶ Trimble VISION\*
- ▶ SureScan\*
- ▶ FineLock
- ▶ Long Range FineLock
- ▶ 3R Laser Pointer\*
- ▶ Tracklight\*
