

Trimble Tornado Antenna

The Trimble Tornado antenna delivers improved GNSS and L-band performance including yield—the ability to obtain positions under difficult GNSS conditions. Its key features are:

- GPS L1/L2
- GLONASS L1/L2 and OmniSTAR capable (L-Band) when used with a GPS Pathfinder® ProXRT receiver
- SBAS capable (WAAS/EGNOS/MSAS)
- Integrated magnets on the bottom of the antenna, allowing it to be directly mounted on the roof of a vehicle
- TNC antenna cable connector

The Trimble Tornado antenna is the standard antenna for GPS Pathfinder ProXRT systems, and is the recommended external antenna option for:

- The GeoXH™ handheld
- The GPS Pathfinder ProXH™ receiver
